

TCDD Website Usage Stats – FY 2010

TCDD switched Web providers during November 2009. As a result of the transition, complete Web usage statistics are not available for FY 2010. Data for four months of 2010 (October and November 2009; August and September 2010) are provided below. As of October 2010 Web usage and tracking data is being gathered from Google Analytics, which will provide more complete data on the use of the TCDD website.

* These stats are for Directories, not individual pages. For example, the Directory for Resources would include the "FYI," Internet resources, college resources, online videos, Annual and Biennial Reports, the People First language handout, etc.

** Hits are not the same as visits. Visits refers to the number of times a person goes to a single page, directory or site. Hits count a number of items per page. For example: If a page has 4 images and a style sheet, one visit could count as 5 hits.
